

Ganesh Adhikari

PROFILE SUMMARY

Experienced Senior Laravel Developer with a strong background in full-stack web development, API and database engineering, and cloud-based deployment. Skilled in designing scalable systems, multi-tenant architectures, and real-time applications using Laravel/PHP, React, Docker, and modern DevOps practices. Proven ability to lead projects end-to-end—from architecture and database design to deployment—while collaborating effectively across teams. Passionate about building reliable software solutions, optimizing performance, and delivering high-impact products.

EXPERIENCE

PHP DEVELOPER, VOXCROW PVT LTD; KATHMANDU, BAGMATI – 05/82-PRESENT

As a senior PHP Developer at Voxcrow I am maintaining and enhancing Voxcrow's call center platforms, Ringaze and GetDesk, focusing on versioning, debugging, and resolving client issues. I configured and optimized Asterisk, FreePBX, and core call engines, multi server configurations, Mysql db clusters with Mysql router, efficient queries, views, functions and triggers to ensure stable and efficient telephony operations. This role is helping to strengthen my expertise in VoIP systems, real-time communication services, and production-level system support.

LARAVEL DEVELOPER, JYRASOFT PVT LTD; KATHMANDU, BAGMATI – 09/81-05/82

As a senior resource at Jyrasoft I got opportunity to lead full-stack development and end-to-end deployment of the YarsaRooms hotel booking platform, implementing Docker-based workflows for efficient development and rapid production delivery. I also architected the database and core logic for the hotel price Channel Manager, ensuring scalable and reliable pricing operations within the system.

LARAVEL DEVELOPER, CODENT INNOVATIONS; BARA, MADHESH – 02/81-08/81

As a senior Laravel developer at Codent Innovations, I contributed to the development, testing, and debugging of the Codent Academy School Management ERP, improving system functionality, performance, and reliability. I worked across core modules to enhance overall product stability while supporting ongoing feature development in a remote, part-time contract role.

FULLSTACK DEVELOPER, BEEHIVE TECH; KATHMANDU, BAGMATI – 07/80-09/81

As a senior Fullstack Developer at Beehive Technologies, I got to lead full-stack development across multiple enterprise projects, including building APIs and authentication for Flutter-based frontend, and deploying the Mobile Garage platform with real-time tracking features on a Dockerized CentOS VPS. I directed the development of a Laravel-React-based Training Management System integrated with NEFSCUN's Java-React-based MIS and architected a scalable multi-tenant Loan Management System with robust role-based access controls for SACCOs.

LARAVEL DEVELOPER, WEBSOFT TECH; POKHARA, GANDAKI – 05/79-06/80

As a mid level laravel developer at Websoft Technologies, I led full-stack development and maintenance of the Nepal Mountain Bikes tour and asset booking platform, ensuring smooth operations and feature enhancements. I also designed the database architecture for a Waste Management System and guided interns throughout the

product development lifecycle, contributing to efficient delivery and system scalability.

FREELANCE DEVELOPER, FREELANCER; POKHARA, GANDAKI – 10/76-05/79

As a freelance backend developer, I delivered multiple full-cycle software projects, including an article publishing platform, a complete Learning Management System, and a terminal-based insurance record system built in C. I also developed and deployed a Computer Institute website, handling domain setup, hosting, and SSL configuration while ensuring stable and secure operations across all delivered solutions. Besides PHP/Laravel I got opportunity to work on multiple stacks for modern applications like Django, Java with my colleagues.

PHP DEVELOPER/INTERN, URU TECHNOLOGY; POKHARA, GANDAKI – 05/75-8/76

During my internship at Uru Technologies, I led the full-stack development of a news and blog publishing platform, contributing to both backend and frontend features while gaining hands-on experience in real-world PHP development and deployment workflows.

EDUCATION

Tribhuvan University, Pokhara, Gandaki – BSC CSIT, 2080

SKILLS

- **Technical:** Laravel (Advanced), PHP 8, MVC, RESTful APIs, OOP, PostgreSQL, MySQL, Redis, Git, Vue.js, React (Optional), JavaScript (ES6+), HTML5/CSS3, Docker, PHPUnit/Pest, API Integration, Query Optimization, Secure Coding, Performance Tuning.
- **Soft Skills:** Communication, Team Collaboration, Agile Development, Problem Solving, Code review, Requirement Analysis.
